

To whom it may concern:

I do not agree with taking K-LOVE off the air for any reason. Since it is a privately funded station, I believe you can look at the financial support that they receive to understand the positive impact it has on many people's lives. They play music that is uplifting. If I have had a bad day and turn on K-LOVE when I get in my car, there is no way that I will have "road-rage". It has a positive effect on me, and by the number of people who financially support them, obviously many others.
